EXPERIENCE

Technical IT - Junior IT Suppport At Commercial Bank of Ethiopia

Currently, I am serving as a Technical IT – Junior IT Support staff at the Commercial Bank of Ethiopia, the largest and number one bank in the country. I work under the Arada District, the bank's biggest district with 38 branches. My responsibilities include providing technical support to branches and district offices for a wide range of system and network-related issues. I also monitor the performance and availability of ATMs within the district and ensure timely maintenance and support whenever issues arise. This role has sharpened my troubleshooting skills, deepened my understanding of enterprise IT infrastructure, and strengthened my ability to manage mission-critical banking systems.

Dec 2024 - Present

Junior Functional Consultant at Red cloud software technologies

At Red Cloud ICT Solutions, the largest SaaS provider in Ethiopia, I served as a Functional Consultant specializing in the implementation of ERP systems for diverse clients. My role involved closely working with stakeholders to understand their business processes, configure and customize the ERP system to meet their specific needs, and ensure seamless integration across departments. I provided hands-on support during the deployment phase, facilitating training sessions for end-users and ensuring smooth adoption. Post-implementation, I continued to support clients by addressing any system issues, optimizing workflows, and providing ongoing functional guidance to maximize the ERP's efficiency.

Dec 2023 - May, 2024

Internship at Ministry of Innovation and Technology

During my internship at the Ministry of Innovation and Technology, I worked as part of the development team, focusing on web development projects. Over the course of three months (July to September 2023), I contributed to the design and maintenance of web applications, participated in team meetings and code reviews, and gained hands-on experience with both front-end and back-end development processes. This role helped me apply my academic knowledge in real-world scenarios and deepened my understanding of collaborative software dev
